6th July, 2019

To whomsoever it may concern

It has come to our notice that SPURIOUS compressors are being sold in the market as “Emerson Compressors” by unscrupulous elements. Usage of such non-genuine compressors results in poor performance, high failures and high power consumption of the appliance apart for being a risk to human life. This results in higher cost of ownership to the customers.

In view of the above, please source Compressors & Electrical Accessories from the Emerson Authorized Dealers only.

Thanking You

for **Emerson Commercial & Residential Solutions**
